Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1) *Some events may not be material individually but may be found material collectively.*
- 2) *Some events may have material impact qualitatively instead of quantitatively.*
- 3) *Some events may not be material at present but may be having material impacts in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviation” beginning on page 2 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

3. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our trading business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of fabric and local transportation. Should our supply of products be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers, or we may not be able to procure products of equal quality or on equally competitive terms, or at all. Such disruption to supply would materially and adversely affect our business, profitability and reputation.

In addition, disruptions to the delivery of fabrics to our warehouse or customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory in our warehouses. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

4. Our revenue has been dependent upon our few customers. The loss of any one or more of our major customers would have a material adverse effect on our business operations and profitability.

For the period ended December 31, 2019 our revenue has been dependent upon our few customers. Our 5 largest customers accounted for about 92.27% of our total revenue for the period ended December 31, 2019. The loss of any such customer or customers would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these customers or that we will be able to replace these customers in case we lose any of them. Furthermore, major events affecting our customers, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major customer becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our income and financial condition.

5. Our Company has not entered into any long-term contracts with most of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.

Our Company has had business relationships with certain customers and has been supplying our products to such customers for a few years. However, we have not entered into any contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could

materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. Notably, such events have not occurred in the past. Orders placed by our Company's customers are dependent on various factors such as the customer satisfaction with the product quality, fluctuation in demand for our Company's products and customer's inventory management.

6. If we are unable to collect our receivables from our customers, our results of operations and cash flows could be adversely affected.

For the period ended December 31, 2019, we had receivables of Rs. 331.76 Lakhs, which represented 74.18% of our total assets as of such date. We are subject to credit risk through our trade receivables and other receivables due from our customers in case of delay. Further, the failure of any of our customers to make timely payment could affect our profitability and liquidity and decrease in resources available to us for other uses. We may also be required to write off trade receivables or increase provisions made against our trade receivable. Any changes in the financial position of our customers that adversely affects their ability to pay and failure of any of our customers to make timely payments may materially and adversely affect our cash flows, business prospects, financial condition and results of operations.

7. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income.

Further, we operate in highly competitive markets in relation to our products where it is difficult to predict whether and when we will receive such awards. As a result, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when such orders are awarded to us and the commencement and progress of work under the orders placed.

8. Our top suppliers contributes major portion of our total material purchases. Any disruption in supplies from them may adversely affect our operations.

Our top 5 suppliers contributes around 81.19 % of our total purchases for period ended December 31, 2019. We do not have any formal agreement with our suppliers. Though we maintain good relations with them, there can be no assurance that we shall be able to continue such relations with any or all of them. Any disruption in supplies from these parties may require us to find additional suppliers. There can be no assurance that we shall be able to find additional suppliers in time or transact business with them on favourable terms and conditions or the quality of products supplied by these suppliers will be at par with those of our existing suppliers. Since such suppliers are not contractually bound to deal with us exclusively, we may face the risk of losing their services to our competitors. Any disruption in supplies from our suppliers due to inexistence of contracts may adversely affect our production process, trading activity and consequently our results of operations.

Further, we procure our products mostly from China. In the event of ongoing COVID-19 pandemic situations and tightening of trade rules with the Country, supply of our products may be obstructed for the time being or at all. In such situations, we may take time to find alternate suppliers which may disrupt our demand and supply chain leading to loss of existing customers and revenue thereto.

9. We have not entered into any long-term agreements with our suppliers for procuring our fabric products and accordingly may face disruptions in supply from our current suppliers.

We are in the business of trading of non -woven interlining fabrics, woven fusible interlinings and microdot fusible interlinings. We procure fabric from traders, dealers and / or manufacturers. Since, these orders are given according to specific requirements, no specific agreement / MoU have been entered into between our Company and our suppliers and we typically transact on an invoice basis for each order. These suppliers provide us the fabric based on trust, service and the ready finance provided by us. In the

absence of written agreements, our suppliers can withdraw the orders from us at any time which may lead to significant disruption in the supply of these traded goods from current sources, or, in the event of a disruption, that we would be able to locate alternative suppliers of the traded goods of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices. If we are unable to maintain our relationship with our current suppliers it may prove difficult to obtain the same from other available suppliers. Notably, our Company enjoys a long-standing relationship with most of its suppliers and there has been no withdrawal of orders or other disruptions in the Company's business on account of the same. Any delay, interruption or increased cost in the supply of our products arising from a lack of long-term contracts could have an effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

10. If our manufacturers are unable to produce fabrics on time we could suffer lost sales.

We do not own or operate any manufacturing facilities and therefore depend upon independent third party to provide us the fabrics. We cannot control all of the various factors, which include inclement weather, natural disasters and acts of terrorism, that might affect a manufacturer's ability to ship orders of our products in a timely manner or to meet our quality standards. Late delivery of our products or delivery of products that do not meet our quality standards could cause us to miss the delivery date requirements of our customers or delay timely delivery of products to our warehouse. These events could cause us to fail to meet customer expectations, cause our customers to cancel orders, which could result in lost sales. The loss of or shutdown of operations at any of manufacturing facilities of the fabric manufacturing companies may have a material adverse effect on our business, financial condition and results of our operations. There could be a possibility of a mishap or an accident at the manufacturing facilities that may result in a loss or shutdown of operations and could also cause damage to life and property. The occurrence of any of these risks could significantly affect our business operations and profitability.

11. The prices we are able to obtain for the textile products that we trade depend largely on prevailing market prices.

The price of the products traded by us has a significant impact on our profits. Textiles has been subject to price fluctuations resulting from weather, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

12. Ours is a High Volume-Low Margin Business. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results and financial conditions.

Our Company is into the growing phase of business cycle. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to interlining fabric procurement, timely sales / order execution and continuous cost control of non core activities.

For the period ended December 31, 2019 our total revenue from operations and Profit after Tax were Rs. 511.83 Lakhs and Rs. 42.21 Lakhs respectively. As part of our growth strategy, we have already initiated steps for increase our revenue of operations, and cater to wider markets. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the timelines. For further details regarding the discussions and explanations for our past results, please refer to the chapter titled "Management's Discussions and Analysis of Financial Condition and Results of Operations" on page 139 of this Draft Prospectus.

13. We require a number of approvals, licenses, registration and permits for our business and failure to obtain or renew them in a timely manner may adversely affect our operations.

We may require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "Key Industry Regulations and Policies in India" and "Government and Other Approvals" at pages 86 and 149 respectively of this Draft Prospectus.

14. Our business is relatively concentrated in Maharashtra region and may be affected by various factors associated at such region and may affect our business, financial condition and results of operations.

Our business is relatively concentrated in Maharashtra region. This concentration of our business in Maharashtra region subjects us to various risks, such as regional slowdown in economic activities and consumer spend in that region, vulnerability to change of policies, laws and regulations or the political and economic environment, civil disturbances or any adverse political, social or economic conditions. While we strive to diversify across states and reduce our concentration risk, there is no guarantee that the above factors associated with Maharashtra region will not continue to have a significant impact on our business. If we are not able to mitigate this concentration risk, we may not be able to develop our business as planned, and our business, financial condition and results of operations could be materially and adversely affected.

15. Our Company has been formed specifically for the purpose of acquisition of the business of A.M. fabrics thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.

Our Company was incorporated as a public limited company under the Companies Act, 2013 and registered with the Registrar of Companies, Central Registration Centre with the name & style “Shine Fashions (India) Limited” pursuant to a certificate of incorporation dated September 11, 2019. Subsequently, our Company has acquired the entire business with the assets and liabilities of M/s. A. M. Fabrics sole proprietorship concern of Mr. Anil Mehta, one of our Promoters, vide Business Transfer Agreement dated September 30, 2019.

Thus, we have very limited operating history from which one can evaluate our business, future prospects and viability as a Company. Further the Company does not have any specific business except for the business acquired from the proprietorship concern in case the company is unable to develop the said business effectively or in a profitable manner then it may have an adverse effect on the operation and profitability of the Company. For further details relating to our history of our Company, please refer to the chapters titled “Our History and Certain other corporate matters”, “Our Business” and “Financial Information” beginning on pages 95, 80 & 116 respectively of the Draft Prospectus.

Further, the company has applied or in some cases will apply for the transition or endorsement of the name of the Company on many of the documents, registration, bank account and other documents which are in the name of our A.M. Fabrics. Any delay in the said transition may require the company to pay any penalty or refusal from any authority of such transition or endorsement which may affect the financial position and operation of our Company.

16. Our Company undertakes job work activities which exposes us to loss in case of Rejection of finished Material.

We engage in job work activities on behalf of our principal employer. The material we process and supply undergo under stringent quality checks. We have in the past faced rejection of material on several occasions which exposes us to risk of additional losses. We may not be able to deliver the requisite quality of goods and may face rejections in future as well, which in turn would affect our revenue, financials and cash flows of the Company.

17. We do not own the registered office from which we operate. Any dispute in relation to use of the premises would have a material adverse effect on our business and results of operations.

The registered office of our Company is located at Office no. 605, 6th floor, Marathon Chamber, P.K Road, Panch Rasta, Mulund West Mumbai -400080, Maharashtra. The said property is not owned by us and has been taken on rent from one of promoter group member. For further details regarding the terms and conditions of these properties refer “Property” on section titled “Our Business” on page 80 of this Draft Prospectus. Any failure to renew the said agreement could force us to relocate to new premises. It may involve substantial time and cost for relocation of the registered office.

In addition, we may not be able to identify satisfactory new premises or may have to incur substantial additional costs towards those premises. Any of the aforesaid could have a material adverse effect on our business, results of operation and financial condition. Any increase of rent would have a material adverse effect on our business and results of operations.

18. Conflicts of interest may arise out of common business undertaken by our Directors, our Promoter and Promoter group.

Our promoter group Entity, Shine India is carrying out business similar to that of our Company. Mrs. Binal Anish Mehta, wife of our Managing Director Mr. Anish Anil Mehta, is proprietor of the said firm. As a result, conflicts of interests may arise in allocating business opportunities in our Company. In case of conflict, our Managing Director may favour this entity in which wife of our Managing Director has interests. There can be no assurance that Promoter Group Entity will not compete with our existing

business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

19. *We rely on third party manufacturers for manufacturing of our products. In the event the manufacturing facilities of our third party manufacturers cease to be available to us at terms acceptable to us, or we experience problems with, or interruptions at such facilities, our business, results of operations and financial condition may be adversely affected.*

We rely on third party manufacturers for manufacturing of our products. In the event that there are any delays or disruptions in the manufacturing facilities of such third party manufacturers, our ability to deliver certain products may be affected. Any of our third party manufacturer's failure to adhere to agreed timelines, whether due to their inability to comply with, or obtain, regulatory approvals, or otherwise, may result in delays and disruptions to our supplies, increased costs, delayed payments for our products and damage to our reputation leading to an adverse effect on our results of operations. In the event these third party manufacturing facilities cease to be available to us at terms acceptable to us or we experience problems with, or interruptions in, such services or facilities, and we are unable to find other facilities to provide similar manufacturing capacity on comparable terms and on a timely basis, our operations may be disrupted and our results of operations and financial condition may be adversely affected.

20. *We are dependent on third party transportation providers for delivery of product to us from our suppliers and delivery of our products to our customers. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.*

As a trading concern, our success depends on the smooth supply and transportation of our products from our supplier to our godown and from our godown to our customers both of which are subject to various uncertainties and risks. In addition, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

21. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into related party transactions with our Promoter, Promoter Group, Directors, KMP's and Promoter group entities. While we believe that all such transactions have been conducted on the arm's length basis and for business exigencies of the company, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. For details of these transactions, please refer related party transactions as restated as appearing in ANNEXURE XXVII in the chapter titled "Financial Information of the Company" beginning on pages 116 of this Draft Prospectus.

22. *Heavy dependence on our Promoter for the continued success of our business through his continuing services, strategic guidance and support.*

We are heavily dependent upon the continued services of our Promoter, along with support of our management team for the continuous success and growth of our organization. Our promoter Mr. Anish Anil Mehta is responsible for the execution of our day to day business affairs. Also prior to the incorporation and acquisition of the business he was running textile business under his proprietorship concern which have been acquired by our Company. The loss of our Promoter or failure to recruit suitable or comparable replacements could have an adverse effect on our business operations and growth strategies.

23. *We have not yet applied for the registration of our trademark. If we fail to obtain trademark registration our brand building efforts may be hampered which might lead to adverse effect on our business.*

Our Company is currently using the ShineFashions(India) Ltd. trademark which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, Our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

Further our Company does not own the domain name "amfabrics.in" as a result of which we might be required to discontinue its usage at any point of time in future. This might adversely affect our business and goodwill. For further details please refer to

section titled “Government and Other Approvals” on page 149 of this Draft Prospectus.

24. Our success depends upon our Directors and the Key Managerial Personnel. Disassociation of our Directors or any failure to retain such key managerial personnel could have an adverse impact on our business, financial conditions and results of operations.

We depend heavily on our Directors and the Key Managerial Personnel to implement our business strategy and carry out our operations. If our Directors disassociate or any of our key managerial personnel resign or discontinue their services and are not adequately replaced, our business operations and the implementation of our business strategy could be materially and adversely affected.

25. In addition to remuneration, other benefits and reimbursement of expenses our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

26. We are subject to risks arising from foreign exchange rate fluctuations, which could adversely affect our financial condition.

We generally import interlining fabrics from foreign supplier. Since the cost is denominated in foreign currency, our inability to hedge foreign exchange risk could adversely affect our financial condition and operations. We currently have not entered into any hedging transactions and may not assure you that we will be able to enter into any such hedging contracts or other financial arrangements on commercially reasonable terms, or that any of such agreements will protect us fully against our foreign currency risk. Any fluctuation in values of foreign currency may have an adverse effect on our business, prospects, financial condition and results of operations.

27. Any deficiency in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.

Our Company is bound by the terms and conditions as placed before its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations.

28. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “Dividend Policy” on page 115 of this Draft Prospectus.

29. Our inability to manage growth could disrupt our business and reduce profitability. Our Business strategy is to continuously grow by expanding the size and geographical scope of our businesses.

This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges

involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

30. Our Promoter play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore it may affect our business if our Promoter disassociate with us.

We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter who has been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoter has been actively involved in the day to day operations and management of the Company. Accordingly, our performance is heavily dependent upon the services of our Promoter. If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or at all.

31. The Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoter will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoter will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter/Promoter Group could conflict with the interests of our other equity shareholders and could make decisions that materially and adversely affect your investment in the Equity Shares.

32. One of the Key Management Personnel is associated with the Company for less than one year.

One of the Key Management Personnel i.e. Company Secretary & Compliance Officer is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter "Our Management" beginning on page 98 of this Draft Prospectus.

33. Reliance has been placed on declarations and affidavits furnished by certain of our Directors/ Promoters and KMPs for details of their profiles included in this Draft Prospectus.

Mr. Anil Zaverchand Mehta, our Non -Executive Director has been unable to trace copies of certain documents pertaining to his educational qualifications. Our Company has obtained confirmations from the him that he has made his best efforts to procure the relevant supporting documents for these disclosures being made in this Draft Prospectus and in spite of such efforts, certain documents were not traceable. Accordingly, reliance has been placed on declarations, undertakings and affidavits furnished by him to disclose details of his educational qualifications in this Draft Prospectus and we have not been able to independently verify these details. Therefore, we cannot assure you that all information relating to the educational qualifications of our Non- Executive Director included in section titled "Our Management" beginning on page 98 are complete, true and accurate.

34. Our Company has not taken any insurance which may expose our company from potential losses to which we may be subject to risk and this may have a material effect on our business and financial condition.

Our Company has not taken any insurance policy related to our registered office, Godown and for keyman Insurance policy of our Company. Any unforeseen situation or any liability will not compensate due to absence of Insurance policy. Further, our business involves risks and hazards which may adversely affect our profitability, including failure of systems and employee frauds. We cannot assure you that the operation of our business will not be affected by any of the incidents and hazards listed above or by other factors.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

35. *Our revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends.*

Our revenues and profits are dependent on several factors such as retaining our key managerial personnel, our complying with laws, managing costs and expenses, maintaining adequate inventory levels and general market conditions. Any adverse change in these factors or a combination of these factors may adversely affect our business operations and the financial condition. Further, our ability to pay dividends will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender's approvals and other factors. Therefore, although, we have consistently maintained the profit levels and reserves, there can be no assurance that we shall have distributable funds or that we will declare dividends.

36. *We have high working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.*

Our business requires a substantial amount of working capital for our business operations. We would require additional working capital facilities in the future to satisfy our working capital need which is partially proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability.

37. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls.

38. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

39. *Any changes in regulations or applicable government incentives would adversely affect the Company's operations and growth prospects.*

The GoI has provided several incentives to the textile sector, from which our Company may benefit, including the TUFs interest and capital subsidies. These incentives could be modified or removed at any time, or new regulations could be introduced applicable to our Company's business, which could adversely affect our Company's operations and financial results. Our Company is also subject to various regulations and textile policies, primarily in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which would have a material adverse effect on the Company's operations and financial results.

40. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The Mumbai is one of the main place for the Textile Industry and this has resulted in huge competitive pressures. We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness is also measured by the technology we adopt as the textile industry is rapidly growing in India and in International Markets. Our inability to compete with this intense competition; local, national and international will have material adverse impact on our Company's financial position.

41. *Our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment.

Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations.

42. *Negative publicity could adversely affect our revenue model and profitability of our Company.*

Our business is dependent on the trust our customers have reposed in the quality of our services. Any negative publicity our Company and service due to any other unforeseen events could affect our reputation and our results from operations. Further, our business may also be affected if there is any negative publicity associated with the services which are being rendered by our Company which may indirectly result in erosion of our reputation and goodwill.

44. *The requirement of funds in relation to the objects of the Issue has not been appraised includes utilisation for general corporate purposes and is based on management estimates. We may have to revise our management estimates from time to time and which may affect our funding requirements.*

The objects of the Issue have not been appraised by any bank or financial institution. These estimates are based on current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy, as discussed further below and are based on management estimates. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change.

45. *The deployment of funds to be raised from the present Issue of shares is at our discretion and no independent agency has been appointed to monitor its deployment.*

Deployment of funds proposed to be raised from the present Issue of shares towards the objects of the Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds towards the object of the Issue will be monitored by our audit committee and our Company shall inform about material deviations in the utilization of Issue proceeds, if any, to the stock exchange and provide the details in the balance sheet about the same.

46. *Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] % of the Issue Proceed. As on date we have not identified the use of such funds.*

We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act.

RISKS RELATING TO EQUITY SHARES

47. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

48. There is no existing market for our Equity Shares and we cannot assure you that such a market will develop. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all.

Prior to this Offer, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The Issue Price of the Equity Shares offered hereby may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to among other factors:

1. Our dependence on limited number of customers for a significant portion of our revenues;
2. Our exposure to risks associated with fluctuations in foreign exchange rates;
3. Our ability to retain and hire key employees or maintain good relations with our workforce;
4. Impact of any reduction in sales of the products of our customers or defects in our customers' products;
5. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity;
6. Increased competition in industries/sector in which we operate;
7. General economic and business conditions in India and in the markets in which we operate and in the local, regional and national economies;
8. Changes in laws and regulations relating to the Sectors in which we operate;
9. Political instability or changes in the Government in India or in the government of the states where we operate could cause us significant adverse effects;
10. Any adverse outcome in the legal proceedings in which we are involved;
11. Failure to obtain any applicable approvals, licenses, registrations and permits in a timely manner;
12. Occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition and
13. dependency on third party transportation providers for delivery of products.

Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our Company's operating results, market conditions specific to the packaging sector in India, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world. The risk of loss associated with this characteristic may be greater for investors expecting to sell Equity Shares purchased in this Issue soon after the Issue.

49. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by the management and the lead manager on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "Basis for Issue Price" beginning on page 69 of this Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Amongst the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;

- Speculation in the press or investment community;
- General market conditions; and
- Changes in economic, legal and regulatory factors (both domestic and international) unrelated to our performance such as global recession, imposition of trade / non-trade barriers and sanctions etc.

50. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

51. *Any future issuance of Equity Shares may dilute the shareholding of the Investor and sales of our Equity Shares by our Promoter or other major shareholders and dilution in net tangible book value may adversely affect the trading price of Equity Shares.*

Any future issuance of our Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital held by our Promoter and other shareholders will be locked-in for a period of 1 (one) year and 20% of our post-Issue paid-up capital held by our Promoter will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. For further information relating to such Equity Shares that will be locked-in, please refer to the sub-section titled "**Notes to the Capital Structure**" under the section titled "**Capital Structure**" beginning on page 47 of this Draft Prospectus.

EXTERNAL RISKS

Industry Risks

52. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

53. *Malpractices by some players in the industry affect overall performance of emerging Companies.*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks

54. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI (ICDR) Regulations contained in this Draft Prospectus.*

As stated in the reports of the Auditor included in this Draft Prospectus under chapter "Financial Information of the Company" beginning on page 116 the financial statements included in this Draft Prospectus are based on financial information that is based

on the audited financial statements that are prepared and presented inconformity with Indian GAAP and restated in accordance with the SEBI (ICDR) Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

55. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long term capital gains exceeds Rs. 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of Rs. 1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

56. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "Key Industry Regulations and Policies" on page 86 for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in

significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

57. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

58. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

59. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

60. The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

61. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely

impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

62. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

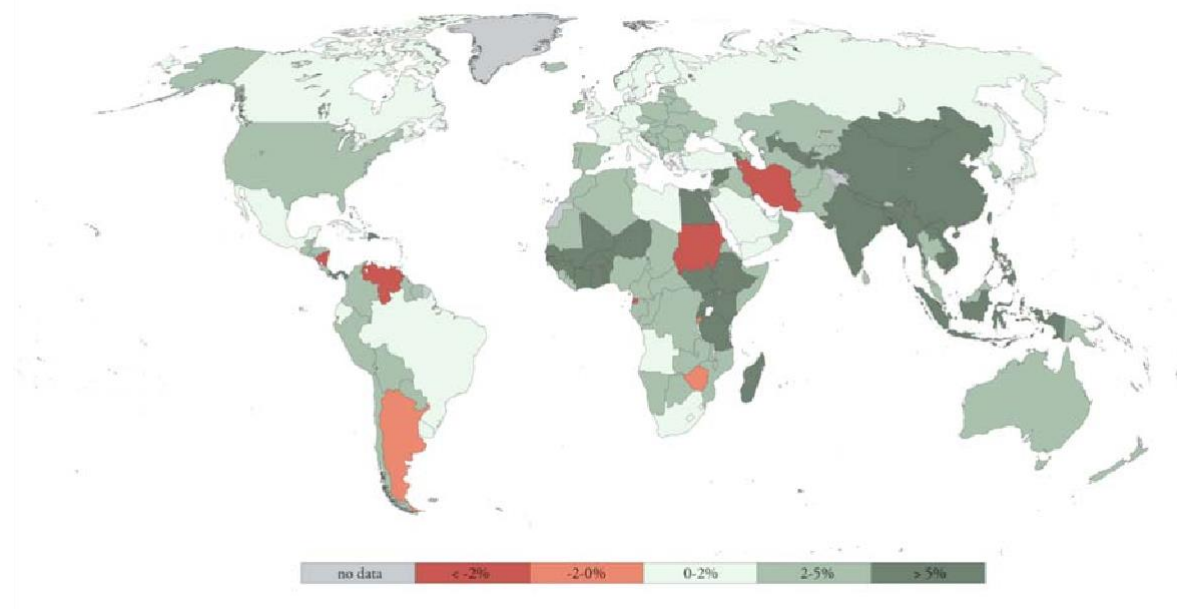

The global growth outlook has weakened amid unresolved trade tensions and elevated international policy uncertainty. Across both developed and developing countries, growth projections for 2019 have been downgraded. Alongside a slowdown in international trade, business sentiments have deteriorated, casting a cloud on investment prospects. In response to softening economic activity and subdued inflationary pressures, major central banks have eased their monetary policy stances.

While part of the growth slowdown reflects temporary factors, downside risks remain high. Prolonged trade disputes could have significant spillovers, including through weaker investment and the disruption of production networks. Recent monetary policy shifts have reduced short-term financial pressures, but may further fuel debt accumulation, increasing medium-term risks to financial stability. These persistent macroeconomic risks are compounded by greater frequency and intensity of natural disasters, reflecting the rising effects of climate change.

In the face of these multifaceted challenges, tackling the current growth slowdown and placing the world economy on a robust path towards the 2030 Agenda for Sustainable Development require more comprehensive and well-targeted policy responses. This should include a combination of monetary, fiscal and development-oriented measures. A coordinated, multilateral approach to global climate policy, including a price on carbon, is an important element of this policy mix. Increasing use of internal CO2 prices by the private sector indicates some willingness by firms to adapt to expected policy changes. The deterioration in growth prospects of many countries that are already lagging behind poses additional challenges for sustainable development, especially the goal to universally eradicate poverty by 2030. Future progress on poverty reduction will, to a significant extent, depend on the effective management of ongoing urbanization, particularly in Africa and South Asia.

Growth projections for 2019 have been revised downward in all major developed economies. In the United States, the growth momentum is projected to moderate as headwinds from trade policy are compounded by the waning effects of fiscal stimulus. In Europe, while the effects of auto production disruptions are expected to dissipate, economic activity will be dampened by weaker confidence, softer external demand and prolonged uncertainty surrounding Brexit developments. In Japan, weak external demand has weighed on investment in the manufacturing sector, while household consumption remains sluggish.

The growth outlook for many developing economies has also weakened. Southern Africa, Western Asia and Latin America and the Caribbean have seen particularly large downward revisions for growth in 2019. The weaker prospects for Southern Africa are attributable to the devastation caused by cyclone Idai, coupled with a subdued outlook for South Africa's economy, which is severely hampered by power shortages. In Western Asia, growth in Saudi Arabia is projected to slow amid oil production cuts, while Turkey will only gradually emerge from recession, following a sharp contraction in domestic demand in the second half of 2018. The downward revision of the outlook for Latin America and the Caribbean reflects weaker-than-expected activity in the region's largest economies—Argentina, Brazil and Mexico—and a further severe contraction in the Bolivarian Republic of Venezuela. In contrast, growth prospects remain favourable in other developing regions, most notably East Africa and East Asia. In China, recent policy stimulus measures will largely offset the adverse effects from trade tensions. Despite downward revisions, growth in India remains strong amid robust domestic demand. *(Source: United Nations Report on World Economic Situation and Prospects as of mid-2019)*

ECONOMIC OUTLOOK OF INDIA

As the world's third largest economy in purchasing parity terms, India aspires to better the lives of all its citizens and become a high-middle income country by 2030. Between 2011-15, more than 90 million people escaped extreme poverty and improved their living standards thanks to robust economic growth. However, India's growth rate has decelerated in the past two years.

In recent years, the country has made a significant dent in poverty levels, with extreme poverty dropping from 46 percent to an estimated 13.4 percent over the two decades before 2015. While India is still home to 176 million poor people, it is seeking to achieve better growth, as well as to promote inclusion and sustainability by reshaping policy approaches to human development, social protection, financial inclusion, rural transformation, and infrastructure development.

While the country's development trajectory is strong, challenges remain. Economic performance has been strong, but development has been uneven, with the gains of economic progress and access to opportunities differing between population groups and geographic areas. Implementation challenges of indirect tax reforms, stress in the rural economy and a high youth unemployment rate in urban areas may have moderated the pace of poverty reduction since 2015. Despite regulatory improvements to spur competitiveness, levels of private investment and exports continue to be relatively low, undermining prospects for longer term growth. The country's human development indicators – ranging from education outcomes to a low and declining rate of female labor force participation - underscore its substantial development needs.

India's ability to achieve rapid, sustainable development will have profound implications for the world. India's success will be central to the world's collective ambition of ending extreme poverty and promoting shared prosperity, as well as for achieving the 2030 Sustainable Development Goals (SDGs). Indeed, the world will be only able to eliminate poverty if India succeeds in lifting its citizens above the poverty line

For international trade and the health of the global economy too, India's growth will be ever more important. Growth is projected to be 6.0 percent this fiscal year and expected to rise to 6.9 percent in 2020/21 and to 7.2 percent in the following year. In addition, the carbon footprint India leaves as it propels its high growth will have a significant influence on the planet's ability to keep global warming within the 2-degree threshold.

On crucial issues ranging from managing scarce water resources, to modernizing food systems, to improving rural livelihoods, to ensuring that megacities become engines of sustainable economic growth and inclusion, India's development trajectory will have a major influence on the rest of the world.

At the same time, India's growing economic and political stature and the relevance of its experience, know-how and investments

for the development efforts of other nations well-position the country to play a greater leadership role in the global arena.

India continues to remain the fastest growing major economy in the world in 2018- 19, despite a slight moderation in its GDP growth from 7.2 per cent in 2017-18 to 6.8 per cent in 2018-19. On the other hand, the world output growth declined from 3.8 per cent in 2017 to 3.6 per cent in 2018. The slowdown in the world economy and Emerging Market and Developing Economies (EMDEs) in 2018 followed the escalation of US China trade tensions, tighter credit policies in China, and financial tightening alongside the normalization of monetary policy in the larger advanced economies. In 2019, when the world economy and EMDEs are projected to slow down by 0.3 and 0.1 percentage points respectively, growth of Indian economy is forecast to increase. (Source: <https://www.worldbank.org/en/country/india/overview#1>)

Growth rate of real GDP (per cent):

India is the seventh largest economy in terms of Gross Domestic Product (GDP) in current US\$ and has emerged as the fastest growing major economy. The average growth rate of India was not only higher than China’s during 2014-15 to 2017-18 but much higher than that of other top major economies (measured in terms of GDP at current US\$ terms) as well. With Purchasing Power Parity (PPP) adjustments, India’s GDP at current international dollar, ranks third in the world.

The contribution of the Indian economy to the GDP of EMDEs and world economy has increased consistently over the years. In a span of less than a decade, India’s contribution to EMDEs GDP has increased by around 1.3 percentage points and to the world economy by around 0.7 percentage points. India’s share in GDP of EMDEs stood at 8 per cent in 2018. As per the WEO, April 2019 of IMF, going forward, the growth of world economy will be bolstered mainly by growth in China and India and their increasing weights in world income. In EMDEs group, India and China are the major drivers of growth. The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. Hence, India’s contribution has become much more valuable to the global economy.

India’s share in GDP of EMDEs and World (per cent)

Outlook of the Economy

The year 2019-20 has delivered a huge political mandate for the government, which augurs well for the prospects of high economic growth. Real GDP growth for the year 2019-20 is projected at 7 per cent, reflecting a recovery in the economy after a deceleration in the growth momentum throughout 2018-19. The growth in the economy is expected to pick up in 2019-20 as macroeconomic conditions continue to be stable while structural reforms initiated in the previous few years are continuing on course. However, both downside risks and upside prospects persist in 2019-20.

Investment rate, which was declining from 2011-12 seems to have bottomed out. It is expected to pick up further in the year 2019-20 on the back of higher credit growth and improved demand. The political stability in the country should push the animal spirits of the economy, while the higher capacity utilization and uptick in business expectations should increase investment activity in 2019-20.

The oil prices increased in 2018-19 by around 14 \$/bbl. However, oil prices are expected to decline in 2019-20 from the current level (based on the oil futures price for 2019-20). This should provide a positive push to consumption.

Prospects of export growth remain weak for 2019-20 if status quo is maintained. However, reorientation of export policies to target countries/markets based on our own relative comparative advantage and the importing country's exposure to Indian goods can foster export performance. Under status quo, the outlook for the global economy is bleak in 2019, with most of the countries projected to slow down. TEXTILE INDUSTRY IN INDIA: OVERVIEW

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. India's overall textile exports during FY 2017-18 stood at US\$ 39.2 billion in FY18 and is expected to increase to US\$ 82.00 billion by 2021 from US\$ 31.65 billion in FY19 (up to Jan 19).

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Market Size

The Indian textiles industry, currently estimated at around US\$ 150 billion, is expected to reach US\$ 250 billion by 2019. India's textiles industry contributed seven per cent of the industry output (in value terms) of India in 2017-18. It contributed two per cent to the GDP of India and employs more than 45 million people in 2017-18. The sector contributed 15 per cent to the export earnings of India in 2017-18.

The production of raw cotton in India is estimated to have reached 36.1 million bales in FY19[^].

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.12 billion during April 2000 to March 2018.

Some of the major investments in the Indian textiles industry are as follows:

- In May 2018, textiles sector recorded investments worth Rs 27,000 crore (US\$ 4.19 billion) since June 2017.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunities and attract investments worth Rs 800.00 billion (US\$ 11.93 billion) during 2018-2020. As of August 2018, it generated additional investments worth Rs 253.45 billion (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854.42 million).

Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiatives taken by Government of India are:

- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for two subsectors of Textiles Industry - Readymade garments and Made ups - from 2 per cent to 4 per cent.
- As of August 2018, the Government of India has increased the basic custom duty to 20 per cent from 10 per cent on 501 textile products, to boost Make in India and indigenous production.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunity and attract investments worth Rs 80,000 crore (US\$ 11.93 billion) during 2018-2020. As of August 2018 it generated additional investments worth Rs 25,345 crore (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854.42 million).
- The Government of India has taken several measures including Amended Technology Up-gradation Fund Scheme (A-TUFS), scheme is estimated to create employment for 35 lakh people and enable investments worth Rs 95,000 crore (US\$ 14.17 billion) by 2022.
- Integrated Wool Development Programme (IWDP) approved by Government of India to provide support to the wool sector starting from wool rearer to end consumer which aims to enhance the quality and increase the production during 2017-18 and 2019-20.
- The Cabinet Committee on Economic Affairs (CCEA), Government of India has approved a new skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore (US\$ 202.9 million) from 2017-18 to 2019-20.

Achievements

Following are the achievements of the government in the past four years:

- I-ATUFS, a web-based claims monitoring and tracking mechanism was launched on April 21, 2016.
- 381 new block level clusters were sanctioned.
- 20 new textile parks were sanctioned
- Employment increased to 8.62 million in FY18 from 8.03 in FY15.

Road Ahead

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market.

High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

ANNEXURE IV

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

1 Corporate Information

Shine Fashions (India) Limited was incorporated on 11th September, 2019 and commenced the business of trading and import of various types of fabrics and textile raw material etc. The company took over the business of proprietorship firm AM FABRICS on 30th September, 2019

1.2 Significant Accounting Policies

a. Basis of accounting and preparation of financial statements

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The Financial Statement relate to the period since incorporation to December 31, 2019 and has been prepared solely for the purpose of disclosure in Draft Prospectus and Prospectus in accordance with SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 as amended from time to time and in accordance with the Guidance Note on Reports or Certificates for Special Purpose (2019) issued by the Institute of Chartered Accountants of India.

b. Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

c. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature reported amounts of assets and liabilities on the date of financial statements and the reported amounts of revenues and expenses during the reported period. Differences between the actual results and estimates are recognized in the period in which the results are known / materialize.

1.3 Cash and cash equivalents (for purposes of cash flow statement)

Cash comprises cash on hand and demand deposit with banks. Cash equivalents are short term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into loan amounts of cash and which are subject to insignificant risk of changes in values.

1.4 Property, Plant & Equipment and intangible assets

Fixed assets are stated at cost less accumulated depreciation and impairment loss, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are

charged to the statement of profit and loss for the period during which such expenses are incurred

Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs which meet capitalization criteria, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortized on a straight line basis over the estimated useful economic life.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. For the purposes of impairment testing, goodwill is allocated to each of the Company's cash-generating units that is expected to benefit from the synergies of the combination. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

1.5 Component Accounting

Due to application of Schedule II to the Companies Act, 2013, the company identifies and determines cost of each component/ part of the asset separately, if the component/ part have a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset. These components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset

1.6 Depreciation and Amortization

Depreciation on fixed assets is calculated on a straight-line basis using the rates arrived at based on the useful lives as per Schedule II to the Companies Act 2013.

1.7 Impairment

The carrying amounts of Tangible Fixed Assets are reviewed at each balance sheet date to determine, if there is an indication of impairment based on external/internal factors. An impairment loss is recognized wherever the carrying amount of Tangible Fixed Assets exceeds its recoverable amount which represents greater of the "net selling price and "value in use" of the respective assets. The impairment loss recognized in prior accounting period is reversed if there has been an improvement in recoverable amount.

1.8 Lease

Lease payments under an operating lease are recognized as expense in the Statement of Profit and terms of lease agreement.

1.9 Foreign Currency Translation:

All transactions in foreign currency are recorded at the rates of exchange rate prevailing on the date when the relevant transactions take place.

Any profit or loss arising on payment for above transactions are recognised as income or expense for that period.

2.1 Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

- i) Revenue/Income and Cost/Expenditure are generally accounted on accrual, as they are earned or incurred.
- ii) Sale of good is recognised on transfer of significant risks and rewards of ownership which is generally on dispatch of goods.
- iii) Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head “other income” in the statement of profit and loss.

2.2 Inventories

Stock In Trade is valued at lower of cost and net realizable value. Cost is determined on FIFO basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

2.3 Taxes

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961.

Deferred Income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

2.4 Earnings per share

Basic Earnings Per Share (EPS) is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the result are anti-dilutive.

2.5 Retirement and other employee benefits:

As explained to us, the company has made an ad hoc provision for Gratuity for the period under review. As the company is newly incorporated the exact provisioning would be worked out by the end of the financial year.

2.6 Provision, Contingent Liabilities and Contingent Assets

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are neither recognized nor disclosed in the financial statements.

1. The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).
